ConRes
IT SOLUTIONS

Simplify Your Supply Chain and Reduce Costs

When your organization acquires new technology, your IT professionals are tasked with the logistics of building and launching your new environment. Every moment your staff is focused on procurement, deployment and configuration rather than core initiatives, it costs your organization time and money. Wouldn't it be nice to offload those responsibilities to a trusted advisor that has a fully staffed facility?

Support and Service That Runs Full Circle

Our ISO 9001:2015 registered Integration & Logistics Center offers:

INVENTORY & ASSET MANAGEMENT

- Equipment warehousing and staging in a secure, climate controlled facility
- Documenting and tracking inventory levels, work in progress (WIP) and finished goods
- Asset tagging, labeling, tracking and barcoding
- Issue birth and death certificates
- Asset decommissioning and data destruction

MULTI-VENDOR MANAGEMENT

- Project management
- Offload administrative tasks so your team can focus on critical tasks
- Coordination with multi-vendor solutions to manage complex global supply chains

STAGING & INTEGRATION

- Rack and stack hardware assembly
- Network connections and hardware configuration
- Software installation and setup
- Configuration and asset documentation
- Remote ability to QA and validate configuration
- Burn-in testing
- Automated builds

GLOBAL SHIPPING

- Global presence
- In-country shipments
- Phased rollouts
- Multi-vendor coordination

ConRes
IT SOLUTIONS

Our Integration & Logistics Center was created to support you through the entire process from design and procurement to implementation, deployment and vendor management. The facility enables our hands-on approach to executing tailored infrastructure rollouts.

Facility Use Cases

Reduce the demands on your already overloaded staff with support for:

Proof of value to simulate and test interoperability with multi-vendor solutions in our secure facility

Rack servers to organize your systems, as well as provide power, rack and cabling

Software imaging to install and burn-in on all appliances

Full configuration and integration of all compute, storage and networking components

Inventory stock and management, which ensures you have what you need when you need it

Product rollouts and phased implementations that deliver staged deployments of large multi-vendor systems globally

Asset labeling, tracking and barcoding to detail the assets you have and document their configuration

Asset decommissioning and recovery for your equipment at end of life, arranging for disposal and supplying certificates of destruction

Delivery logistics to multiple locations globally

" We provide services for our customers that range from the simplest image loads to complete configuration, integration, labeling, shipping, tracking and inventory control. Our consistency sets us apart. Once the customer's exact specifications are met, we deliver to those specifications every time. "

- JOHN PERKINS
Director of Traffic/Warehouse
