

# 9 Ways to Save Using FinOps

Looking for ways to reduce spending and increase the value of your cloud investments? ConRes Cloud FinOps creates visibility into billing and spending trends and uses that data to improve cost optimization by right-sizing services.

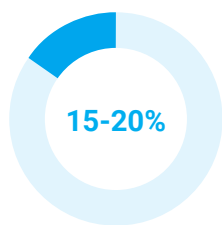

## 1 Resource Optimization

Save up to **35%** by identifying and eliminating idle and underutilized resources.

35%

## 3 Automated Scaling

Auto-scaling can lead to a **15-20% reduction** in cloud costs by adjusting resource capacity based on demand.

## 2 Cost Transparency

**20-30%**

reduction in cloud spending by increasing visibility and accountability.

## 4 Continuous Monitoring

See a **25-30% reduction in cloud expenses** through continuous monitoring and cost management practices.

## 5 Discount Management

Experience up to

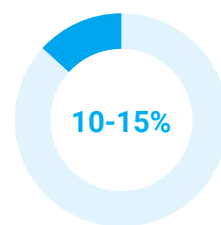

**75%** savings

with Reserved Instances compared to on-demand pricing.

## 6 Governance and Policies

Save a possible **10-15%** by preventing unauthorized usage and enforcing best practices with cloud governance and cost management policies.

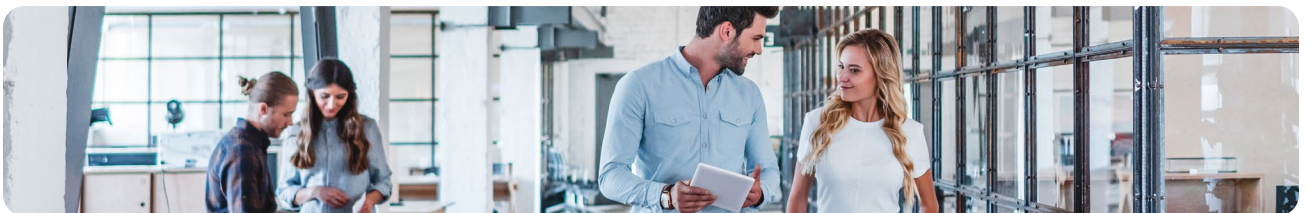

## 7 FinOps Culture

Capture a **15-25% reduction in spending** with better cloud collaboration and shared cost management responsibility.

## 8 Cost-Aware Development

Identify a **20-30% reduction** in cloud spending by designing applications with cost efficiency in mind.

## 9 Chargeback and Showback

Reduce cloud costs by **10-20%** by implementing chargeback and showback models, which can improve cloud cost accountability.

ConRes helps customers realize their potential savings by bringing the right tools and talents together. Contact us to schedule an assessment discussion and take a modern approach to the cloud by streamlining operations and maximizing the ROI of cloud-based services.

ConRes helps empower efficient decision-making, balancing cost, performance, and speed.
